**Subject:** Update

Happy New Year Walter!

Just wanted to give you a quick update. We are about 2/3rds through the engineering design for the Cement Lock plant. I also wanted to inform you that I have been having a dialogue with EPA headquarters regarding Superfund projects and the use of the Cement Lock technology to resolve some of these issues. I will be in DC the balance of this week and will report back to you. I thank you for your support of the Cement Lock technology for the Passaic and look forward to your continued support in the future.

See you in February at the CAG meeting! If you have any questions, please don't hesitate to contact me.
